CORE SKILLS

- Flutter / Dart
- iOS — Swift
- Android — Java / Kotlin
- Node.js / TypeScript
- AWS Services
- Firebase

AI TOOLING

- Claude Code
- GitHub Copilot
- Figma MCP
- MCP Integrations

ARCHITECTURE

- Riverpod / Bloc
- Clean Architecture
- Platform Channels
- RESTful APIs
- CI/CD (GH Actions)

SECURITY

- Secure Storage
- Biometric Auth
- Certificate Pinning
- Root/Jailbreak Detection

PLATFORMS

- App Store
- Google Play

PROFILE

Accomplished Senior Mobile Engineer with 9+ years of experience specialising in cross-platform and native mobile development (Flutter, Swift, Kotlin/Java). Proven track record of leading full application migrations and rebuilds, defining technical architecture, and driving AI-augmented development workflows including Claude Code and Figma MCP integrations. Drove a flagship fintech application to the #1 Finance App ranking on the App Store Ireland. Experienced working autonomously with full ownership of architecture decisions, stakeholder communication, and App Store / Play Store submissions. Passionate about building secure, high-quality mobile experiences for regulated financial environments.

EMPLOYMENT HISTORY

Senior Mobile Developer & SDK Engineer | CleverCards, Ireland (Remote)

February 2023 — Present

- Led the complete architectural redesign and rebuild of the flagship Flutter mobile app, achieving the **#1 Finance App** ranking on the App Store Ireland.
- Architected and built the CleverCards B2B Mobile SDK (iOS, Android, Flutter), enabling third-party integration of card management features across Ireland, UK, and US markets.
- Designed server-to-server token architecture and backend APIs (Node.js / TypeScript) supporting SDK authentication flows across multiple platforms.
- Integrated AI-assisted development workflows using Claude Code, GitHub Copilot, and Figma MCP integrations for automated UI scaffolding from designer handoffs.
- Implemented security-critical features: biometric authentication, secure token storage (Keychain / Keystore), jailbreak/root detection, and ML Kit OCR-based receipt matching with a three-tier validation system.
- Reduced application crashes by **20%** through scalable architecture redesign eliminating legacy bugs.
- Integrated Apple Pay and Google Pay, and maintained full ownership of App Store and Play Store submission pipelines.

Technologies: Flutter, Dart, Swift, Kotlin, Node.js, TypeScript, AWS, Firebase, Apple Pay, Google Pay, Claude Code, Figma MCP

Mobile Technical Lead | SnapEx, Hong Kong SAR

October 2022 — January 2023

- As sole mobile engineer, rebuilt a cryptocurrency exchange application from the ground up using Flutter — full ownership from architecture definition to App Store / Play Store submission.
- Defined complete mobile architecture and established coding conventions ensuring consistent code quality and reliability across the codebase.
- Delivered measurable improvements to application performance and user satisfaction through the full rebuild.

Technologies: Flutter, Dart

Senior Mobile Developer | Shuei Trading, Tokyo, Japan

May 2021 — September 2022

- Spearheaded development of a new e-commerce mobile application, contributing to a **70% increase in active users**.
- Functioned as Mobile Tech Lead, defining architecture and coding conventions for the entire mobile codebase.
- Led an outsourced development team, managing requirements analysis, technical proposals, and timeline estimations.
- Implemented user-feedback-driven features resulting in a **30% increase in user engagement**.

Technologies: Flutter, Firebase, VueJS, .NET Core

Senior Mobile Developer | The Collective C, Ho Chi Minh City, Vietnam

April 2020 — April 2021

- Led the mobile team, defined application architecture and coding conventions to enhance project efficiency.
- Reviewed code and mentored junior engineers, resulting in a **40% improvement** in team-wide code quality.

- Researched and integrated emerging technologies including Blockchain and NFT into production features.

Technologies: *Flutter, Android (Java/Kotlin), iOS (Swift), GraphQL, MapBox, Realm, Firebase*

Software Engineer | Zien Solutions, Ho Chi Minh City, Vietnam

July 2018 — April 2020

- Full-stack ownership of key projects including the AVflow no-code video platform — back-end and front-end.
- Designed database schemas, integrated AWS services and third-party APIs to optimise video-based application workflows.

Technologies: *Android (Java/Kotlin), iOS (Swift), Flutter, NodeJS, AWS, Angular, MSSQL*

Android Developer | ARIS Vietnam Co., LTD, Ho Chi Minh City, Vietnam

March 2017 — June 2018

- Developed and maintained native Android projects for clients in the Japanese market within an Agile/Scrum environment.

Technologies: *Android (Java/Kotlin)*

EDUCATION

Bachelor's Degree in Information Technology | HCMC University of Natural Resources and Environment

2013 — 2017
